WUNDERLICH VALVE COVER PROTECTORS

The cylinders on a Boxer BMW are exposed. Stone strikes, falls on terrain or when scraping a plastered wall as you maneuver in tight spaces make it easy to scratch the valve cover. On the 1250s shift cam engines there's also the issue that the construction of the shift cam mechanism is extremely elaborate. Since the valve covers are mounted solely using force locking, there is a risk that the valve cover can be displaced relative to the cylinder head after any violent impact and the elaborate valve drive can be pulled along with it in certain instances. Therefore, the additional protection of the valve cover is of particular importance.

We have developed a set of well-designed protectors for this. These are characterised by the fact that they sit on the valve cover with narrow gap dimensions and accurately fit the contour. This requires precision manufacturing. The protector consists of impact-resistant, durable plastic. On the inside which faces the valve cover, we

have constructively integrated segments with an elastic material that is resistant to high temperatures. These segments are dimensioned to be impact-absorbing in terms of Shore hardness^{*)}. When impacted by exterior forces, their equally supportive and protective effective ensures that these are absorbed and distributed equally across the segments and force spikes are thus avoided. The high-quality design and the function of the protectors is rounded off by an inset stainless-steel insert. In the worst-case scenario, it protects against grinding of the valve cover and thus avoids the inevitably associated loss of oil. The protectors thus contribute to avoiding secondary damage. In many instances, they let you carry on riding after the mis-hap. The assembly kit provided makes assembly easy. Our valve protectors are Made in Germany. That's why we're happy to provide a 5-year warranty.

*) indicator for the material hardness of elastomers and elastic polymers

FUNCTION

- Reliable protection of the valve cover against the consequences of stone strikes, against damage from a fall or when manoeuvring
- Precision manufactured, contour fit with small gap dimensions
- Made of durable, impact-resistant special plastic
- Constructively integrated impact-absorbent segments
- Avoidance of force spikes through equal distribution of effective forces over multiple segments
- Stainless steel insert for protection against grinding of the valve cover in the event of a crash
- Avoid secondary damage
- Integrated design that incorporates into the layout of the motorcycle
- Complete with assembly kit

REALITY CHECK

TECHNICAL SPECIFICATIONS

- Material: High-quality, impact-resistant plastic, precision manufacture with integrated impact-absorbing segments, integrated stainless steel insert for protection of the valve cover

PARTICULARITIES

- Wunderlich premium product. Small series. Handcrafted.
- Wunderlich design. Integrated and functional.
- 60 days right to return
- Made in Germany
- 5-year warranty

FITTING FOR FOLLOWING MODELS

- R 1250 GS, R 1250 GS Adv., R 1250 R, R 1250 RS, R 1250 RT

VARIANT | AVAILABILITY | PRICE*

- Black (#35613-002) | immediately 12/2019 | 199,90 €

* Prices may vary from country to country (VAT)
