

## SYSTEM PROTECTION. BOTTOM SIDE.

### MORE PROTECTION FOR THE POPULAR BMW F 750 GS - WUNDERLICH'S NEW CENTER STAND PROTECTION PLATE

Wunderlich complements the underfloor protection of the popular BMW F 750 GS: The new center stand protection plate consists of black anodized aluminum and proves itself as ideal combination to the engine protection »EXTREME«, in order to complete the protection of the Enduro.

#### The center stand protection plate

The center stand protection plate provides reliable protection for the center stand, exhaust outlet and the swing arm mounting. In combination with the matching engine protection „EXTREME“, all technical components between front and rear wheel are protected against mechanical stress such as impact or stone chipping. In addition, in the event of a contact with the ground, the machine can slide over the entire protective surface until the rear wheel regains grip. In this way, the underside of the motor and gearbox are perfectly protected. The danger of getting stuck or levering out is reduced. Wunderlich achieves the high mechanical stability of the center stand protection plate by using high-strength, corrosion-resistant aluminum with a material thickness of 4 mm. The form-fit mounting on the main stand provides additional stability and secure hold. The main stand protection is black anodized to match the »EXTREME« motor protection. The integrated design of the center stand protection plate is functional: Cut-outs allow water which has been collected during river crossings to drain off freely.

#### Summary

The center stand protection plate is the consistent and logical addition to the Wunderlich engine protection »EXTREME«. With the engine protection, engine, outlet, front silencer and oil tank are reliably protected. The center stand plate provides additional protection for the center stand, exhaust outlet and the swing arm mounting. This considerably reduces damage caused by stone chips and dangers to people and technology that might lurk from touching down or the potentially dangerous levering out of the machine during off-road use, and significantly increases passive safety.

The price of the center stand protection plate is 87,63 €, it is Made in Germany, therefore Wunderlich gives a 5-year warranty on this product as well.

Wunderlich offers a variety of model-specific components for all current BMW models and many older model series.

#### Item-nos.:

25852-102 - Wunderlich centre stand protection plate - black (87,63 €\*)

26840-302 - Wunderlich engine protection »EXTREME« (232,97 €\*)

Wunderlich centre stand protection plate for the BMW F 750 GS (Item-No.: 25852-102)

Maximum protection for main stand, exhaust manifold and swingarm base

Reliable, underside protection for motor and gearbox
